

Nokia Beacon 3.1

Overview of Customer Features

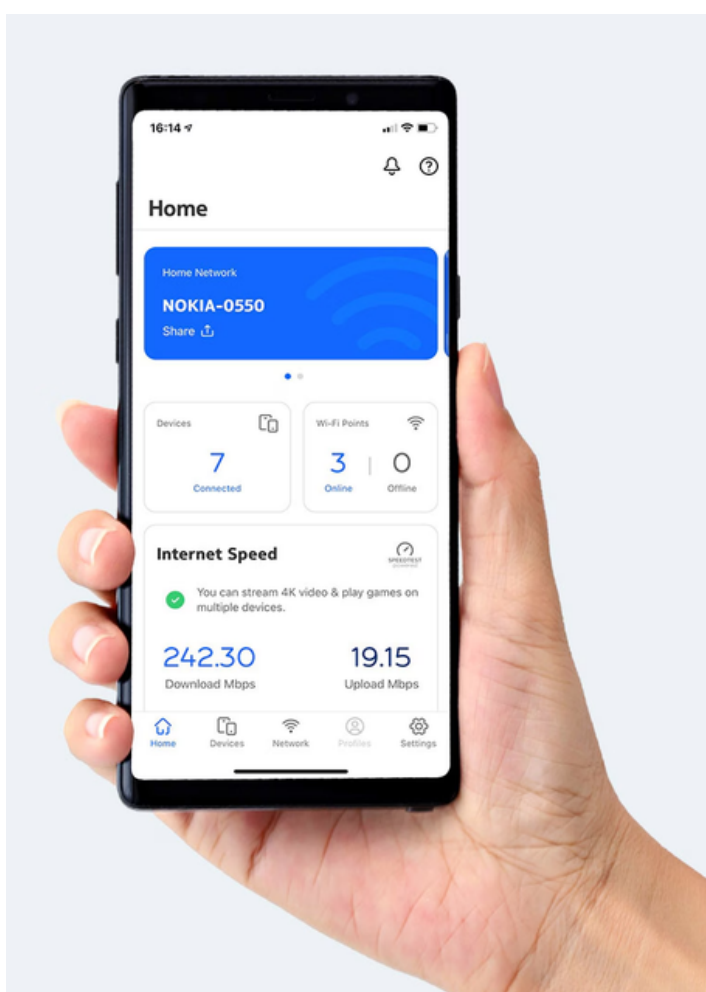

Key Features

- Ability to add multiple Beacons to increase Wi-Fi coverage throughout the mesh network.
- Uses band steering, allowing a single Wi-Fi network name (SSID) for both 2.4 GHz and 5 GHz bands.
- Ability to separate the 2.4 GHz and 5 GHz networks for devices that do not support band steering.
- Supports Wi-Fi 6 technology.
- Includes two Ethernet ports for hard-wired devices.
- Create one or more Guest Networks so visitors can access the internet while remaining isolated from your home network, all while enjoying Wightman's fast and reliable internet service.

The App

- The Nokia WiFi app allows you to:
- Change your Wi-Fi network name and password.
- View devices that are currently connected to and using the internet.
- Run a speed test to verify the speeds being delivered to your network.
- Create profiles for individual devices or groups of devices.
- Profiles allow you to manage internet access with a variety of parental control features

Parental Control Features:

- Pause or resume internet access at any time.
- Set schedules to enable or disable internet access automatically.
- Set a bedtime schedule to restrict internet access during certain hours.
- Block access to specific websites
