

Transferring Data to a New Phone

Transfer Your Data to Your New iPhone

Use Quick Start to easily transfer your apps, photos, contacts and other data from your old iPhone to your new one.

1. Turn on your new iPhone and place it beside your old iPhone.
2. Make sure Wi-Fi and Bluetooth are turned on on your old iPhone.
3. Follow the on-screen instructions on both phones.
4. Choose how you want to transfer your data:
 - Transfer directly from your old iPhone, or
 - Download from iCloud.
5. Keep both iPhones close together and plugged into power until the transfer is complete.

Tip: The transfer can take some time depending on how much data you have. You may also be asked to activate your cellular service and set up Face ID or Touch ID.

SAMSUNG

Transfer Your Data to Your New Samsung Phone

Use Samsung Smart Switch to easily transfer your photos, contacts, apps and other data.

1. Charge both phones and make sure Smart Switch is installed.
2. Place the phones close together (within about 4 inches).
3. Open Smart Switch on both phones.
4. On your old phone, tap Send data → Wireless.
5. On your new phone, tap Receive data → Galaxy/Android → Wireless.
6. Tap Allow on your old phone.
7. Select what you want to transfer, then tap Transfer.
8. When the transfer is finished, tap Close.

Tip: Moving from iPhone to Samsung? Download the Smart Switch app on both phones to easily transfer your contacts, photos, videos, messages and other data to your new phone.
